**Design and Evaluation
of a Personalized
Human-centered
Dietary Decision
Support System among
Diabetic patients**

**Developing Evidence
based question-
response for
prevailing nutrition
related problems**

Our SHINES

"The newsletter will provide recent updates about the various national and International nutrition informatics projects, and highlight some of the major nutritional challenges that can potentially be solved through various nutrition informatics interventions using data, information, and knowledge frameworks. We also highlight some of the students successes in the field of nutrition informatics research and practice. In addition, we bring together stories of the students' learning experience with the real nutrition informatics projects addressing the real public health challenges."

Blog

**An Overview of Behaviour Change Interventions to
Address Food Insecurity**

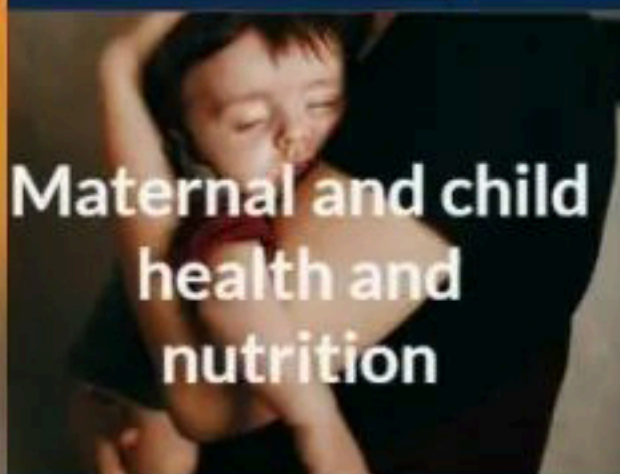

**Inaugural Batch of Certificate
Program in Health and Nutrition
Informatics**

***"The Batch 1 of the Certificate
program in Health and Nutrition
Informatics started on 24 th January
